Notes:

1. If you believe you have shot a new range record, please verify that the following information is recorded by the Match Director: **Name, Match, Date fired, Event, Stage (if applicable), and Score with x count.**
2. If a standing record is an integer score without an x count, and it is tied by other scores which includes x counts, the record will be shared by the standing record and the tied integer score(s) with the highest known x count(s).
3. If a record with an x count is tied, to the x, the record will be shared.
4. A * denotes a record for which the date of the match the score was fired is no longer known or was not recorded. It is imperative to capture the date when a record score is fired to completely honor the achievement and dedication of the shooter as well as provide a complete history of record scores fired.
